

Prince Albert Victor
(Duke of Clarence)
&
William Gull

*William Gull (1816-1890),
1st Baronet of Brook Street, was a
19th-century English physician. He
came from a modest family and
was physician to Queen Victoria.
Since 1970 he's been linked to the
unsolved 1888 Whitechapel
murders.

*Prince Albert Victor (1864-1892)
was second in the line of
succession to the British Throne
but he never became King: he died
before his father and his
grandmother, the Queen. He is in
Marie José suspects list.

Now let's find out if either of these are our Ripper. To further our research we used, from Marie José folder, a letter which was coded : there were calculations.

To do the calculations we used proper fractions (fractions where the numerator is smaller than the denominator) and improper fractions (fractions where the numerator is greater than the denominator)

At the end we found digits and using the alphabet we found the corresponding letters of the message.

The message said:

"William GULL: Conference in Glasgow - 11/8/88

Duke of Clarence: Hotel in Edinburgh - 9/30/88"

These two dates correspond with two of the murders in Whitechapel that's why these two people are **innocent**.

This is historical fiction from the high school Notre Dame de la Paix, Place du Concert, Lille.
